EXPERTS IN SOLUTIONS

INOXPA offers complete turnkey installations for the food, beverage, dairy, pharmaceutical and cosmetic industries, covering both liquid and solid projects, in addition to in-house manufacturing and automation.

We have total product ownership of most of the fluid handling components used in our skids (valves, pumps, agitators, mixers and blenders), facing full responsibility for after-sales service, and we guarantee direct, efficient support with no intermediaries.

MIXING SKIDS

BIOREACTOR

Stirred-tank bioreactor designed to provide a controlled environment where microorganisms, animal or plant cells, or biomass can grow, multiply and produce specific biological products.

MIXING REACTORS

Reactors with various mixing and agitation options for products with different characteristics and viscosities.

MCR

Counter-rotating blenders for mixing and homogenizing dispersed products at a controlled temperature with an optimum performance.

MIXING SKIDS

MIXING OF SOLIDS

V-type or double-cone mixers that ensure homogeneous mixing of solids.

SOURDOUGH PRODUCTION

Comprehensive solution for producing craft bread on a large scale.

HEAT TREATMENT

HTST

Pasteurisation treatment system used to eliminate pathogens, to make the product safe for consumption and extend its shelf life.

UHT

Sterilization treatment system used to eliminate heat-resistant bacteria and microorganisms, in order to increase the product's shelf life and stability during the conservation period.

CIP

CIP

CIP systems designed to facilitate the cleaning of process lines, remove impurities and reduce bacteria levels. They can be adapted to all types of installations and operated either manually or automatically.

PRODUCT RECOVERY

PIGGING

Recovery system for viscous or high-value products remaining inside the pipeline after production processes.

DOSING

DOSING OF SOLIDS

Skids for dosing solid products during mixing processes.

DOSING OF LIQUIDS

Skids for dosing and mixing of liquid products.

CASE STUDIES

From its very first moment, INOXPA has had but one objective: to satisfy the needs of its customers. To achieve this goal, INOXPA is committed to bringing a quality service closer to the customers.

PILOT PLANT

We have a fully equipped Pilot Plant where we can carry out all kinds of tests and replicate recipes on a small scale to validate manufacturing processes using INOXPA's skids.

The results allow our engineering team to advise customers on how to optimize their manufacturing processes.

DISTRIBUTION NETWORK

Our extensive network of branches and distributor partners ensures we are close to our customers to guarantee them a fast and effective service from project development through to implementation and validation, including after-sales phase, and throughout the installation's useful life.
